Right Stuff Problem Solving Workshop

Does the same problem or issue or pain point keep resurfacing in different forms? Stuck on how to tackle it once and for all? Learn a proven, repeatable approach to tackling tough problems that will keep them from rearing their ugly heads again. Get to the right problem, pick the right solution, and get moving forward on the right next step.

This full-day class covers the foundations of effective problem solving, using our own proven methodology. We begin with making sure that you're solving the right problem, using best practices in root cause identification along with effective facilitation and brainstorming techniques. From there, we move to identifying the best possible solution options, knowing that not every problem has just one solution, and not every solution option is the right choice for right now. You'll be exposed to key components of successful decision-making and an approach that helps you bring others along. And finally, our session closes with how to create the right plan of action for you, beginning with taking that critical next step.

With practical, hands-on examples, in this highly interactive workshop you'll learn how to identify the right problem, uncover the right solution, and put the right action plan into place. Gain easy-to-apply tips that help you collaboratively solve even the most complex problems, head-on, without getting overwhelmed by the problems you're facing and without becoming distracted by the first solution that comes along.
